Cyber Power

RMCARD302 Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.

The CyberPower RMCARD302 is a full-featured network UPS management device that remotely manages, monitors, and controls CyberPower Smart App Online UPS products.

The internal card allows remote monitoring and control of a UPS via Web Browser or NMS connection. By utilizing the auto-shutdown software, servers and workstations stay protected from data loss due to power failure. Event logging tracks the UPS operational history. Automated event notifications via email or SNMP Trap can be setup to insure real time status of changes to the UPS and its input voltages.

Firmware can be updated by users to insure you have the latest features and updates. MD5 security management is also provided to protect the integrity of the UPS and network.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- Real time UPS monitoring for Smart App Online Units
- Remote management and configuration of UPS (HTTP) via Web Browser or NMS
- Automatic events notification via Email, SMS, and SNMP Trap
- User upgradeable firmware
- Event & Data Logging
- Support TCP/IP, UDP, SNMP/HTTP, NTP, DNS, SMTP protocols
- MD5 security management

RMCARD302 Remote Management Card Remotely manage, monitor and control your UPS from a web browser or SNMP management application.
